

Haverstraw Landfill

West Haverstraw, New York

Presented at 5th Annual LMOP Project Expo – December 14, 2001

The Town of Haverstraw is looking for a partner to help develop an LFG utilization project at its closed landfill. The Haverstraw Sanitary Landfill opened in 1970 and closed in 1996. The Town of Haverstraw, New York, owns the landfill.

The landfill is not required by NSPS to install a LFG destruction system, and does not currently have an LFG collection system. The town of Haverstraw issued an RFP for a gas utilization project in 1999, but could not find a suitable proposal. The landfill is located close to a U.S Gypsum facility and other potential end users.

Located in Rockland County, the landfill is located at 555 Beach Road, near the intersection with Grassy Point Road, in Haverstraw, New York.

LMOP met with the Town of Haverstraw in May 2001 to discuss the potential for energy recovery, and has been working with them subsequently. Please contact Brian Gillen if you'd like more information, or want to talk about the possibility of a project.

The Environmental Protection Agency's Landfill Methane Outreach Program would like to thank the Town of Haverstraw for participating in this year's Project Expo.

Landfill Specifications

| | |
|-----------------------|----------------|
| Waste in Place | 1,200,000 tons |
| LF Area | 46 acres |
| LF Depth | 60 - 80 feet |
